‘There is no alternative’: An introduction to political humour and invective, 1979 - 1990

Par Michael Lavin, professeur en classes préparatoires

The ‘Thatcher decade’ was a period of upheaval and profound change in Britain, marking the end of consensus politics. Michael Lavin will be taking a look back at the 1980’s and considering how the political humorists dealt with the burning issues of the day. He will also pick out some of the more memorable examples of MPs’ jibes and biting wit and ask whether political insults can still do any serious harm to political opponents in an age of spin doctors and news management.
